

Child Development Specialists

About Mother's Choice

Mother's Choice is a local charity serving the many children without families and pregnant teenagers in Hong Kong. We join hands with our community to give hope and to change the life stories of vulnerable girls and children. Our vision is to see every child in a loving family.

Early Intervention Services (EIS) Program

We strongly believe that Early Intervention Services (EIS) can offer developmental support to children with diagnosed disabilities and to children at risk of not achieving their developmental milestones. As the developmental needs of these vulnerable children are often neglected, they have commonly lost their first six years - the prime years - of social, mental, physical and emotional development. To address this concern, Mother's Choice has developed an EIS program for our children in 24-hour care in our Child Care Home. We are seeking qualified medical professionals who share our passion and vision, to support our EIS program by providing child development assessments and therapies to children living in foster homes or from under-privileged families.
